Your due date for an assessment is 10 years from the last time you passed an MOC exam. You do not need to pass another assessment until the due date shown on the home page of your ABIM Physician Portal. You can choose between the Knowledge Check-In or the traditional 10-year exam for meeting your assessment requirement based on availability and your eligibility for each.

More info: abim.org/WhentoTry

You can choose which assessment pathway works best for you. You can decide to take either the Knowledge Check-In every two years or the traditional MOC exam every 10 years.

More info: abim.org/Options

The Knowledge Check-In is not offered on-demand. If you register early, you have a better chance of securing your preferred testing day and appointment time. Example: abim.org/IMexam

You can choose different assessment pathways for different certifications. Choose the option that works best for your individual situation. More info: abim.org/Options
You still need to complete any approved activity (of any point value) every two years and accumulate 100 MOC points every five years no matter which assessment option you choose. Taking the Knowledge Check-In every two years, however, would meet your two-year requirement.

More info: [abim.org/Requirements](abim.org/Requirements)

You can earn your MOC points at any time, before or after you take an assessment. As long as you complete the activities by the deadlines shown in your portal, you will be meeting your MOC requirements. Note: Taking an assessment will earn you MOC points.

More info: [abim.org/Points](abim.org/Points)

You only have one MOC program. The MOC points that you earn apply to all of the certifications you are maintaining. You also just pay one program fee that covers all of the certifications you choose to maintain.

More info: [abim.org/Points](abim.org/Points)

You do not need to submit a CME certificate. In fact, ABIM is not able to grant MOC points based on the CME certificate. You earn MOC points for CME activities when the provider of the activity registers it for MOC in ACCME’s system and submits your completion data to ACCME.
